

Providence Center for Facial Paralysis

Providence Center for Facial Paralysis is a multidisciplinary team of physicians dedicated to improving the quality of life of patients with facial paralysis and facial nerve disorders. Our experts are board-certified in Facial Plastic and Reconstructive Surgery, Otolaryngology–Head and Neck Surgery, Plastic and Reconstructive Surgery, Neurological Surgery and Neurology. We are happy to offer care to patients with both acute onset or long-standing facial paralysis. The Facial Paralysis Center is based in our state-of-the-art hospital where we offer treatment using the latest technology and your post-operative care. Our surgeons routinely work together to optimize efficiency in the operating room and ultimately provide you with the best outcome. For patients who are not surgical candidates, or who do not desire surgery, we offer multiple non-surgical management options. In addition, we can perform many of our procedures under local anesthesia in one of our procedure rooms located in Mill Creek or Everett. Many of these treatments are typically covered by insurance. Please call us for more information or to schedule a consultation.
